The beauty of nature, within your reach.

Impressions in Stone is a Tulsa-based manufacturer of custom-made stone and thin brick products for use in all types of construction projects.

Pictures of many projects using our stone can be viewed at www.ImpressionsInStone.biz.

A list of our commercial projects can be downloaded at www.ImpressionsInStone.biz/gallery.

Professionals who install our stone can be found at www.ImpressionsInStone.biz/installation.

We help clients save both time and money without sacrificing quality.

Our products are comparable to and excellent substitutes for those offered by other manufacturers, including:

- **Canyon Stone®**
- **Cultured Stone®**
- **Centurion®**
- **Coronado®**
- **El Dorado®**
- **LoneStar®**
- **Tejas®**
- **Sunset Stone®**

The most compelling reason to use our product is that it is **absolutely beautiful**. We offer stone styles plus thin brick, and more than 30 standard color schemes. We are experts at both matching and creating colors, and have many years of experience creating custom blends to meet style and color requirements.

Clients love our **price** compared to other manufactured stone.

- The **Downstream Casino Resort** saved almost $100,000
- **Wal-Mart** stores in Oklahoma and North Carolina achieved tremendous cost savings
- 60 **McDonald's Restaurants** are saving almost 50% on the cost of stone
- The **Grand River Dam Authority** saved $64,446
- **Reasor's Grocery** in Jenks saved $32,618
- The **First United Methodist Church** saved $31,296

We have been manufacturing custom-made stone and thin brick in Tulsa since 2004. Architects, builders, and installers have used our stone in a wide variety of both commercial and residential applications.

Our products are warranted for a period of **50 years** against manufacturing defects. We confidently offer this warranty because we use only the best ingredients in our products, including portland cement and a structural-grade lightweight aggregate. Colors are produced by adding synthetic iron oxide pigments to the mixture.

We use Bayferrox, one of the most popular color pigments worldwide for coloring concrete. These pigments meet or exceed stringent color and quality specification parameters set forth by ASTM C979. They are highly resistant to ultraviolet effects for excellent color retention and long-term performance. As a result, our custom-made stone will not only maintain its color for decades, but also requires absolutely minimal maintenance and is resistant to the elements.

While the majority of our installations have been in northeastern Oklahoma, our stone has been chosen for applications nationwide, such as Goldsboro, North Carolina (Wal-Mart), Springfield, Missouri (hospital), Lincoln Nebraska (Christ's Place Church), plus Wichita, Kansas and Amarillo, Texas (Case & Associates Apartments). We can arrange shipping to any location within the contiguous 48 states.

We provide everything you require including stone samples, color samples, technical specs, addresses and pictures of completed projects, and our client list so that you can be confident you have chosen the best manufactured stone product. Our entire team is available to provide support for the successful execution of your project.

The following submittal documents are available:

- Product Specification Sheets
- 50-Year Warranty
- Frequently Asked Questions (www.ImpressionsInStone.biz/faq)
- Installation Professionals (www.ImpressionsInStone.biz/installation)
- Installation Instructions
- Project Submittal Cover Sheet
- Generic Specifications
- Material Safety Data Sheet

We sincerely appreciate the opportunity to meet your manufactured stone requirements. Please contact me if you have any questions or require additional information.

Dagan Heaps
Owner, Impressions in Stone

P.S. Our manufactured stone should qualify for at least 1 LEED Regional Priority Credit.
